

The Presidents Fixer: (A Financial and Conspiracies Thriller - a prequel to the Legacy Thriller Series)

As a weapon of war its unlike anything else. It can cripple vital homeland services shut down power grids for example, bringing a country to its knees in just days. Igor Komarov, The Russian Presidents Fixer, is out to find it and then steal it and will do anything to succeed in this as his position of power depends on it. Tipped off by GCHQ, Angus Macrae hides it away with his team that developed it on a remote Scottish island. The question is, can Macrae and maverick ex-SAS ally Tom Traynor outwit the massive Russian surveillance machine that Komarov is using to find it? For if Komarov succeeds and gets his hands on it, his boss will have no scruples using it against civilians in his retaliation against the West for their arrogant sanctions. For both sides, theres everything to play for, everything to lose. Some hopefully helpful notes from the author : - The Presidents Fixer is a prequel to the Legacy Thriller Series and is an introductory novella of some 32,000 words, around 120 pages in print. It is an ideal way to meet the principle protagonists in the Legacy Thriller Series and is aimed at giving readers an appetite for the other fuller 90,000-plus word novels that follow it. It is a complete stand-alone thriller in its own right and is briefly described above.. The second book in the Series, Betrayed was first published at the end of November 2015 under the title Komarovs Conspiracy and tells of the mayhem that ensues as soon as the mole discloses the location of Macraes team and the weapon. It covers the several attempts of Komarov and others to steal it. These include a couple of kidnappings a tried and tested method of getting ones way. It also tells of the unusual steps Macrae and his allies take to counter their enemies. The third book in the Series, End Game, tells what happens when a powerful Russian Oligarch acquires the weapon for an altogether more sinister and devastating agenda. Will his secret

behind the scenes pitting of the West against Russia be discovered before real war breaks out between the two of them? And what can even the ever inventive Tom Traynor do to stop catastrophe engulfing them all? Interview with the Author by local radio station. Q. Why did you pick cyber warfare as the background for you books? A. Although I realise that few are interested in computers or cyber-warfare, the potential devastation that a major computer malfunction or hacking disaster may bring one day soon to all of us, I think means that we should know a bit more about the threats we all live under. Q, - So, although fiction, are your books based on reality? A. Very much so. Although the next great leap forward - quantum computers is a technology still in its infancy, my books just speed up their arrival and the extraordinary and frightening powers that they possess. Q. Why did you decide to publish on Amazon and other eBook channels? A. Even the immensely successful J.K.Rowling had her first Harry Potter book turned down by I believe it was a dozen publishing houses. With Amazon or Smashwords, you just publish, as easy as that. And, for readers it is so easy to find what theyre looking for. For example, on Amazon, they only have to look up thrillers in books or be more specific, look under thriller ebooks for say action-packed thrillers, financial thrillers, or conspiracy thrillers to find a vast selection to choose from. My own books also come under sub-headings such as kidnapped or assassin for readers who particularly enjoy those genres. Q.- I read somewhere that there are literally hundreds of new books go up onto Amazon every day, how are people ever going to find your books? A. I dont know is the short answer; I think its difficult to make money in ebooks these days unless of course you have a well-known name as an author or are a celebrity. For me its reward enough when someone takes the trouble to write a nice review.
