

## A Critical Loss of Balance

How far would you go to restore the balance in your life that a tragedy had stolen from you? Cliff Elliott thought he had endured the worst thing a parent could endure when his nine year old daughter was kidnapped, but he was wrong. The circumstances that led to her return were far worse than anything he could have imagined. And now Cliff, a man who rarely uttered a cross word, a man whose temperament and nature were as gentle as mans could be, had his life thrown irreparably out of balance. Suddenly nothing in Cliffs life felt right. He couldnt concentrate on his job, he couldnt give his daughter the attention she needed or his wife the loving and nurturing she deserved. All he could think about was finding the men that took his daughter. As hard as he tried, he couldnt put his life back into balance. He soon realized that there was only one thing that would, and Cliff knew exactly what that was. So, left with no other choice, Cliff Elliott set out not for revenge, but for justice; a justice that he hoped would restore the balance that was now profoundly absent from his life. But the price he would have to pay to regain his balance was much higher than Cliff ever imagined it would be and thrust him into a world that was like nothing he had ever seen before. In fact, Cliff almost paid the ultimate price almost. So take a walk in another mans shoes and try to imagine what you would do if you were faced with, A Critical Loss of Balance. A Critical Loss of Balance is the third novel of suspense from Mark E. Shaver, author of The Second Verdict, and After the Fact.
