

Kiss My Asset: Thrice (American Fairy Tale series) (Volume 3)

The final book of an American Fairy Tale...America has become both the land of the free loaders and the home of the criminal brave hearts.I am so happy that you asked me that particular question, since Im the current redneck representative of the hard working American people. And youre the fucked up US federal government representative, Mr. VP.An illegal alien enters our American boundaries from many nations around the world without a birthday party invitation. Half of the sons of bitches cross our boundary through an inadequate federal government border security system, while the other half of the bastards breaks the American law and do not leave when their American visa card expires, making all the assholes illegal to live here within our soil.Then the American laws are un-enforced by the US federal fucking government, because the US federal government leaders like to get pissed on by the large dicks of the wealthy free enterprise corporations that use lot of cheap labor of many, many illegals to feed their big fat money profits.Or the US federal government leaders feed the pig squeaking racial groups that have nothing better to do then dump their smelly pig shit on the true hard working Americans, whos great, great, great, great-grandpa and grandma nose bleed and then died here as the original Americans.The foreign country of Canada, ya know, that big piece of frozen land above the Great Lakes of Michigan, USA along with the foreign country of Mexico, ya know, the one below the State of Texas, USA. Both countries are the primary main and major funnels for many, many illegal aliens into our native country of America, USA.Your fucking so-called elected representatives of the American people in the executive, legislative, and judicial branches of the US Federal Government allow killing terrorists, evil druggers, illegal aliens, violent asshole

criminals, and infectious contagious diseases from both human and animal. The human and animals stray and stay within the dirt of the USA. The biggest problem is the foreign country of Mexico. The foreign country of Mexico is a super corrupt failed government-state rampant with tons of mass murders, kidnappings, assassinations, rapes, and robberies. Hell. If I lived within Mexico City, then I'd run away too. The US law authorities have documented that the foreign country of Mexico encourages their poorest people, their criminal folks, and their other shit asses to illegal immigrate into the USA. Since both foreign countries of Canada and Mexico makes lots of US dollar money from a set of working low-paying US jobs in USA America. Land of the free makes the Mexican economy highly dependent upon the US dollars flowing out of America into the foreign poor government bank accounts, thus more illegal aliens and illegal drugs float and flow back and forth from us to them, Mr. Vice President of the United States. Thanks for listening, Mr. Vice President of the United States. Now this leads into me into an illegal plot which is a real American fairy tale, yall.
