

# The Legend of Mordecai Sackett; Part 1; PLANET of the GOATS: PLANET of the GOATS (Volume 1)

In his first booklength work of fiction, the author explores an alternate reality on a rare planet in a unique solar system. In this cosmic space-time dimension, man owes his self-awareness to an ancient language written on parchments made from goatskins. With the help of this phonetically-disposed programming language, a new age is genetically switched in human consciousness and mankind's ancient history is evaluated from the perspective of the animal kingdom, offering an alternative interpretation of how the early hominid was domesticated. In observing the predatory behavior of the carnivores, man learns to hunt and kill his prey with the help of the dog. In observing the behavior of the herbivores, man goes from being a hunter to hunter-gatherer and, with the help of the goat, man resorts to farming. Everything he knows, man owes to the flora and fauna of the natural world that surrounds him.
