

## James Thomson: Essays for the Tercentenary (Liverpool University Press - Liverpool English Texts & Studies)

James Thomson: Essays for the Tercentenary is the first collection of essays devoted exclusively to the works of the eighteenth-century Scottish poet James Thomson. The volume is divided into two sections, the first addressing Thomsons writings themselves, and the second the reception of his works after his death and their influence on later writers. The first section contains essays analyzing the politics and aesthetics of Thomsons major poems and also a reevaluation of Thomson as a heroic dramatist. The second section capitalizes on the certainty felt by many in Thomsons own century that the poet, especially through his most successful poem *The Seasons*, had won for himself an indelible fame. This volume provides a definitive reappraisal of his achievement for our own times.
