

D909

Indiana Jones meets The Monuments Men in this action-packed archaeology adventure. D909 is a top secret task force organized to stop the flow of antiquities from terrorists to the black market. Looted artifacts are being used as currency to fund the most insidious criminals and until now, no one has been able to stop them. Comprised of two independent but linked teams, D909 has a unique combination of brains and brawn that allows them to get in and out of active war zones quickly. Dr. Antonia Warren leads a select group of archaeologists with a vast knowledge of high-value antiquities. They're supported by a tactical operations unit led by Cole Donovan, a former paramilitary officer with extensive covert operations experience working in areas where the US government can't legally go. Together they give D909 a lethal effectiveness necessary to stop the flow of cash into the wrong hands. A long-forgotten ancient city has been found deep in the Amazon Rainforest-- directly in the path of a new and unrelenting faction of terrorists that has quietly grown in strength while the world was focused on problems across the globe. Lies, deception, and secrets from within the team will test their abilities as they race against the clock to save history from bankrolling a new war. Mary Chris Escobar, Next Generation Indie Book Award Winner: One of my favorite things about this story was the characters. The D909 team is full of uniquely drawn individuals, each with their own personality quirks, which leads to unconventional friendships and amazing teamwork in the face of danger. Think of it as The Goonies, all grown-up. Readers who enjoy action adventure, spies, technology, secret organizations, history, and teams working together, will enjoy D909.
