

## Imagine a Time Capsule (Inside Mosacs Almanac Book 2)

Inside Mosacs Almanac -Science Fantasy-speckled with Light and Darkness The back story The Arcanites became a secret sect of wizards chosen by Quell, the creator God. The original Arcanites came from ancient shaman mystics, but after the A.D calendar Arcanite power waned sharply. Due to infighting their numbers declined until they faced extinction. Yubungu, The Blackness, had confused the beast Moolbol and this caused much agitation amongst these wizards. Imprisoned on Drallagoon, often called Chysk, Moolbol, through Frice and its Red Hole had a tacit link to Earth. To ratify this link Moolbol experimented with mortal creatures to create farrowirgs and send them to investigate the cosmos. A vague sense of Frice chose the farrowirg direction for them. For generations they travelled conquering all they met, cosmic feelers for their confused dark lord who needed to pinpoint where Frice ended to break free and unravel Quells Universe. Mosac Mosac was an Arcanite wizard chosen to annihilate his fellows. He came across ancient writings, had an epiphany and changed from prosecutor to reformer to become ostracized. This prompted him to protect the font of Quells knowledge within an impenetrable temple of his device, and connect this temple to an almanac; an almanac with disjointed parts of himself, able to jump to any point throughout time, even after his death. Book2 Imagine a Time Capsule Sargolus is a powerful alien who commands mighty warlord Prieffes and a whole fleet of ships surrounding a small core world. Belan and his elf love - Tyeainne, have the unenviable task of using Sargolus to uproot Moolbol - a terrible beast from Eichrouous, the Universe before time. Is the Prieffe Queen Envel an ally to them in this? Perhaps not, but she does have interest in something Belan can do for her, and without her assistance there is good reason for them both to die. Tyeainne is not Belans only companion.

Gyros, a disgusting alien also accompanies him, and another Prieffe, Prince Rulbald, wants Gyros and anything associated with this deplorable creature removed. Does the Prince have more influence than Queen Envel? One would think so, hes by far the favorite in Sargolus circles, and yet Sargolus needs the Queen, for now at least.

After a punishing game and trial, Belan and his companions are enlisted by Queen Envel to discover a mystery intruder hidden amongst the Sargolus realm. Finding this intruder requires Belans quirky technical skills. He has many, but they might not suffice and their lives depend upon him. So, from a tyrant aliens vicious game, Belan and his new love must struggle to find a place in an environment full of strange creatures. This part of their quest is to find Contoid and its link to Moolbols elfin land, far away. The intruder, hidden from all, complicates matters, as does threat from viral infection, and looming war. The story includes Belans estranged wife, Mauree - and her plight against the wizard, Derba and his allies - who hound her, and now threaten her sisters life too. Mauree depends upon her witch friend, Sonyana for help, but witches have their own companions - in this case a supernatural snake with hunger in its eyes. Derba has his finger in many hot pies, can anyone stop him? Other stories build a backdrop from Mosacs Almanac and elsewhere, in this second book of five. Their quest is to find Contoid and its link to an elfin land far away. To do this they must first unmask a creature hidden from all, but Belan soon discovers this creatures skill at staying elusive, and as he and his love come under threat from viral infection, and the tyrant aliens forces, a war unfolds around him.
