

# ISO 4480:1983, Coniferous sawlogs -- Measurement of sizes and determination of volume

The vocabulary given in ISO 4476 applies to the methods specified. The thickness shall be taken as the middle diameter or the diameter of the upper end. The length shall be measured in metres, rounded to two decimal places. The volume shall be determined in cubic metres to two decimal places. This title may contain less than 24 pages of technical content.
