

Lena River Man

Adventure, Mystery, Thriller The action moves from Alpine glacier, to Las Vegas, then across the Siberian Sea to the geographic North Pole by Russian Nuclear Icebreaker. State-of-the-art science, extensively researched by the author, involves a large number of the main characters. Profound ethical problems are raised. An ingenious, and virtually unique method for commission of murder, keeps the suspense mounting, page by page. Much of the background draws upon the many years of author experience dealing with exotic wildlife both in, and out, of Africa. A cold-blooded unscrupulous killer will do anything to continue an accustomed life-style. American and Russian authorities confront the murderer as the nuclear powered vessel ice-breaks a path to the pole. The scientific sub-plot will take the reader by surprise, as will the ending.
