

Bygora Vandos ~ Sinclair V-Log LB734/A (The Sinclair V-Logs Book 2)

One of the worst crimes against humanity the space cop has ever witnessed. The people of Bygora Vandos just wanted to know what was killing their trees and poisoning their soil. The mysterious Calmarin Research Station promised to do just that, but that was years ago and still there was no answer. An unexplainable death catches the attention of the Law Enforcement Agency, and Sam Sinclair is dispatched to investigate. Working undercover with his new partner Ren, they begin the slow process of working their way into the company. Sam finds many allies amongst the local people but with his cover blown and Ren taken prisoner, he no longer knows who can be trusted. As the job reaches its explosive climax and the personal cost to Sam takes its toll, the shocking truth finally comes out.
