

Mines of Mars: Arsia Mons

With the expanse of Pavonis Mons behind them, Al and Lorna lead their team into the depths of a new mountain. With the exploration of Pavonis Mons still in full swing they lead a small crew into Arsia Mons to start the next phase in their adventure. There is trouble brewing outside as a giant sand storm threatens the facilities on Mars. As the extent of the disaster becomes apparent, Al and his crew race against time and space to try to pull a miracle out of their hats. Al and his crew must figure out the alien technology in order to save the hundreds of thousands of inhabitants of Mars. They are the only hope.
