

Chris Valle: Paintings from the Nodular Sclerosis Series

Nodular Sclerosis is the type of Hodgkins disease that consumed my wife Athenas lymphatic system. These pill-shaped paintings are derived from our journey through the treatment of this cancer. / The floating islands within the paintings are symbolic of the feeling of isolation that comes with the treatment of cancer. Like many patients, Athena felt alone; felt that no one knew what she was going through. Most of the time she was on so much medication that she was not coherent--I was in the hospital room all alone with my wifes body--a body which was on the verge of shutting down. I would sit in the dark hospital room and look at my wife covered in IVs and blankets up to her neck, because of this atmosphere, my view of Athena was mainly a profile silhouette of her face. In certain paintings silhouettes of my wifes body become part of the islands expressing this isolation.
