

Fog (Modern Plays)

Dis is a war zone, ya get me? An we gotta take em all out, see? Fog is about two families: one white and dysfunctional, the other black and aspiring. Fog and Lou were put into care as young children by their soldier father, Cannon, following the untimely death of their mother. Ten years later, Cannon returns, expecting to reassemble his family around him. But he feels a stranger in this new England of broken promises. And nothing could prepare him for the damage that abandonment and an inadequate care system has wreaked on his kids. He desperately tries to repair what has been broken, but is it all too little too late? Fog is a stunningly powerful and gritty play which confronts important social themes with a clear-eyed lack of sentimentality. The play looks at the care system and the effects on the children placed there. It explores the difficulties we face in trying to reconnect with people who have been absent throughout childhood, and the inadequacy of communication: words are used as loose sticking plasters to try and patch up and hide the exposed wounds of fractured relationships.
