

NG1: I am Reliable (Volume 2)

This is the second installment of a totally awesome NG1 Trilogy that the first installment is bound to make you hungry for! The first installment NG1 It is Gray on Purpose was good, but this second installment NG1 I am Reliable is even better with the third installment the best of them all! See for yourself in this book the continuing development of all the interesting characters and the many more insights designed to help you in your everyday struggles, to help you conquer them, and that should be Helpful with a capital H, which is my sincerest wish for all! Read what others have said of this installment of the greatest Trilogy ever written! Picture yourself hundreds of years into the future travelling all over our galaxy with the best views of all the battles with combatants trying vigorously to end each others lives! It is like you are right there hovering over their shoulders as the troops yell and battle one another, witnessing them try every secret trick they know to stay alive! You are right there almost walking with them as other interesting characters are on adventures! Who ever you are with you get to enjoy their most guarded secrets and thoughts! That's what this book and the whole NG1 Trilogy has! So says someone who looks like Captain Kirk, but is not due to a time line change created by the red eyed computer coming back in time. This Captain Kirk is in some sort of Star Trek uniform beaming a smile and clutching his fists that practically shouts, yes, I am human with emotions. He also seems glad to have gotten in a better endorsement than Spock and the red eyed computer adding, No computer or Vulcan for that matter will ever match the emotions a human has! Wait, I am getting something! I predict you will enjoy this book and the whole NG1 Trilogy and be amazed at how dead on accurate all the claims about the books are, like they are the greatest! Its Shawn and

Gus from psych, but not exactly due to the time line change, more like how your local actors would dress up to look like Shawn and Gus for the time line change affected them more than the others for some reason maybe due to them ending up closer to the red eyed computer and maybe actually crossing paths with it. This Shawn, though, was still holding one hand to his head while shaking his fingers up and down with the other while giving his predictions. Shawn is confident in his predictions, one hundred percent, for everyone who has read the NG1 Trilogy has said the same thing. When Gus gives him a look like are you sure, Shawn goes to a side bar with Gus and tells him to relax, he has also read the books and agrees too, plus parts of them are so funny! Gus then gives Shawn another look saying like yeah, right, you read the books and Shawn has to admit his girlfriend read him the books while they were laying out on the roof catching some rays. This Gus tells Shawn he has read the lease agreement four times and they have no access to the roof. Shawn replies with another smile that they do now up the supply closet to the attic where a solar panel easily pops out and then back in again. Oh wow, all kidding aside, they have describe the essence of this book and the whole NG1 Trilogy perfectly! Im feeling the love from some big time looking like celebrity people for this book right now. I am also feeling a lot of love for all the readers to be of this book, and it shows in all of the books I have written, if you take the time to read them! Take the time to open up NG1 I am Reliable and begin reading and see for yourself the utmost care for the reader I have, showing in the great advice and great efforts to help you that are on par with other writers like Saints in the church, the really good ones. I dare say you will find something written here in this NG1 Trilogy just as moving and life changing as what those Saints wrote that puts a smile on your face, energy to your steps and brings better living to you for the rest of your life!
