

Sentenced Before Birth: A Journal About Infertility and Miscarriages: A Womans Hope, Faith, Fortitude and Resilience

As a woman, Cathy never questioned having children. When the time came, she discovered with horror the terrible chemical molecule named DES. Cathy is a DES daughter, as her mother took it when she was expecting. Aside from facing some uterus cancers, DES daughters have tremendous difficulties conceiving and/or carrying a pregnancy, and when they are fortunate to do so, it remains a story of pain, despair and everlasting hope: a true crusade against fatality. This is the story of Cathys five children who never became more than embryos or fetuses. Legally, theyve never existed, yet they have changed her life forever; they are her shooting stars. As of today, Cathys refusing to accept the fatality of DES; she will continue her crusade for motherhood.
