

2/4 Cavalry Book 8: Radio Free Mashara (Military Scifi)

For ten years the European Space Union has been at war with the Muslim Coalition and now things are starting to come to a close. Kush will be returned to its former masters, while Mashara will go to the European Space Union. 2/4 Cav is sent back to Mashara to help effect the handover while dealing with another enemy: military politics and the problems that arise when people use that to get ahead instead of focusing on the real mission, which is the exodus of its former masters and subsequent annexation. And please while I would appreciate reviews of my book, please read it before making a review, thank you.
