

ISO 3322:1985, Fluid power systems and components -- Cylinders -- Nominal pressures

Provides a selection of nominal pressures expressed in bars from 6,3 up to and including 400 bars. The nominal pressure shall be assumed to be gauge pressure (i.e. the pressure above the atmospheric value) when no modifier is given. This second edition cancels and replaces the first edition (1975). This title may contain less than 24 pages of technical content.
