

## Star Watchers: Inspirational, Romantic and Dark Poems that Merge to Tell a Single Story

Nourishment is not only required for the body, but for the mind and soul. Not only do we need to exercise our bodies, we need to exercise our spirit. The poetry in Star Watchers nurtures through the beauty and power of words. -Liana Jennings, LA Times

Star Watchers is a collection of over 50 diverse poems, where a handful of selected poems merge to tell a greater story, of love, darkness and the hard-earned journey of life. The book captivates the imagination, provokes fear and leaves readers in wonder with a shocking discovery. Several poems are inspired by Edgar Allan Poe. The challenge is to figure out which poems piece together the larger story called, Star Watchers. The key is to pay close attention to the reappearance of characters and phrases; particularly, the series of poems also entitled, Star Watchers. Star Watchers uses fantasy, horror, and inspirational elements to provoke new ways of seeing the human condition. The poetry depicts unhappy, nervous, bitter and clever individuals; they found themselves in both triumphs and defeats. Unfortunately, these characters often met with the fate of tragedy and unexpected twist. Their misfortunes serve not only to entertain but also to inform its readership. Each poem and each character draws out a meaningful message for readers to take away with them. Yet, after piecing the poems together, there is an even bigger story left for readers to determine for themselves.
