

## Unthology 7

Wonderful and Frightening Short Fiction from New and Established Writers Flinch at the things that twitch in the windows a mile up from the city streets. Let text messages lead you towards a man that you already know is going to mess with your head. Find the meaning of life in your own lobotomy. Now, the ghost of Gaudi whispers in your ear, urging you to get yourself another lover, insisting its all going to be smooth and comfortable this time. Ruin yourself and drift towards the haunted shores of your youth. Then find yourself back there, returned to the low-down slums of a city in a country that no longer exists, that UNTHOLOGY 7 documented and mapped out for you, and you alone, a long, long time ago.
