

White Noise: An A-Z of the Contradictions of Cyberculture

Transcending recent attempts to pigeonhole the information revolution, this book shows how the paradoxical aspects of new media and the Internet (is it masculine or feminine? Does it mean peace or war?) are the peculiarly intense expression of the contradictions underlying our whole society. Andrew Calcutt is an enthusiastic champion of the potential for new communications technology, and a trenchant critic of the culture of fear which prevents its realisation.
